

Report under Texas Business and Commerce Code Section 120.053

Information on YouTube's transparency reporting under Texas Business and Commerce Code §120.053

YouTube is producing transparency reports with details on its acceptable use policies and practices as part of efforts to provide greater transparency to Texan users. This report is in addition to the various reports we already produce that provide data and shed light on how and why users raise complaints, how we respond to those complaints, how we enforce our Community Guidelines and content policies, and how we comply with local laws to keep users safe.

This report outlines information about YouTube during the specified reporting period, January 1, 2025 to June 30, 2025. We expect to submit reports covering subsequent data periods as specified in Texas Business and Commerce Code §120.053.

Acceptable use policies

YouTube's [Terms of Service](#) highlights various policies that outline what is not allowed on YouTube. These policies include YouTube's [Community Guidelines](#), [Advertiser-Friendly Content Guidelines](#), [Copyright](#), and [related policies](#), which are made accessible in YouTube's [Help Center](#) and apply to all types of content on YouTube.

Implementing and enforcing YouTube policies

Each of YouTube's policies is carefully thought through so they are consistent, well-informed, and can be applied to content from around the world. New policies go through testing before they go live to ensure YouTube's global team of content reviewers can apply them accurately and consistently.

YouTube relies on a combination of people and machine learning technology to flag inappropriate content and enforce YouTube's Community Guidelines. In some cases, that same machine learning automatically takes an action, if there is high confidence that content is violative given information about similar or related content that has been previously removed.

Community Guidelines enforcement

After a creator's first Community Guidelines violation, they will typically get a warning with no penalty to their channel. They will have the chance to take a policy training to allow the warning to expire after 90 days. Creators will also get the chance to receive a warning in another policy category. If the same policy is violated within that 90-day window, the creator's channel will be given a strike.

If the creator receives three strikes in the same 90-day period, their channel may be removed from YouTube. In some cases, YouTube may terminate a channel for a single case of severe abuse, as [explained](#) in the Help Center. YouTube may also remove content for reasons other than Community Guidelines violations, such as a first-party privacy complaint or a court order. In these cases, creators will not be issued a strike.

If a creator's channel gets a strike, they will receive an email, and can have notifications sent to them through their mobile and desktop notifications. The emails and notifications received by the creator explain the action taken on their content and which of YouTube's policies the content violated. More detailed guidelines of YouTube's processes and policies on strikes are available [here](#).

YouTube also reserves the right to restrict a creator's ability to create content on YouTube at its discretion. A channel may be turned off or restricted from using any YouTube features. If this happens, users are prohibited from using, creating, or acquiring another channel to get around these restrictions. This prohibition applies as long as the restriction remains active on the YouTube channel. A violation of this restriction is considered circumvention under YouTube's [Terms of Service](#), and may result in termination of all existing YouTube channels of the user, any new channels created or acquired, and channels in which the user is repeatedly or prominently featured.

Government removal requests

Governments contact Google, including YouTube, with content removal requests for a number of reasons. Government bodies may claim that content violates a local law, and include court orders that are often not directed at Google, including YouTube, with their requests. More information on government requests to remove content is available on the Google Transparency Report website [here](#).

Copyright enforcement

YouTube offers a suite of copyright management tools that gives rightsholders control of their copyrighted material on YouTube. These tools have allowed creativity to thrive, while giving creators and artists the tools and resources needed to manage their content online. The Copyright Transparency Report shares information about the copyright enforcement efforts on YouTube. More information on copyright enforcement is available on the Google Transparency Report website [here](#).

Coordinated influence campaigns

Google's Threat Analysis Group (TAG) and Trust & Safety Team work to monitor malicious actors around the globe, disable their accounts, and remove the content that they post, including but not limited to coordinated information operations.

One of TAG's missions is to understand and disrupt coordinated information operations threat actors. TAG's work enables Google teams to make enforcement decisions backed by rigorous analysis. TAG's investigations do not focus on making judgments about the content on Google platforms, but rather examining technical signals, heuristics, and behavioral patterns to make an assessment that activity is coordinated inauthentic behavior.

TAG regularly publishes its TAG Bulletin, updated quarterly [here](#), which provides updates around coordinated influence operation campaigns terminated on Google's platforms, as well as additional periodic blog posts. In the Bulletin, TAG often notes when findings are similar to or supported by those reported by other platforms.

The publicly available H1 2025 TAG Bulletins (January 1, 2025 to June 30, 2025) show **34,177** YouTube channels across **52** separate actions were involved in Coordinated Influence Operation Campaigns. Industry partners supported **four** of those separate actions by providing leads.

Monetization policies

If a Creator has turned on ads monetization for a video but our reviewers and automated systems identify that the video does not comply with our Advertiser-Friendly Content Guidelines, the video will have limited or no ads appear against it. However, if Creators believe that their video is still suitable for all brands, they can request human review of that video. More on our monetization policies [here](#).

YouTube video demonetizations due to violations of monetization policies

Alerting and actioning under our Community Guidelines policies

The following is information on alerting and actioning globally under Community Guidelines policies between January 1, 2025 and June 30, 2025.

Note: References to removals under the Community Guidelines enforcement category "Spam, misleading, and scams" were updated to "Scams, deceptive practices, and scams" to better reflect the types of content captured under [this policy](#).

Removed, appealed, and reinstated videos

YouTube relies on teams around the world to review flagged videos and remove content that violates our Community Guidelines; restrict videos (e.g., age-restrict content that may not be appropriate for all audiences); or leave the content live when it doesn't violate our guidelines or warrants an exception for educational, documentary, scientific, or artist context.

The total number of videos removed by YouTube for violating its Community Guidelines during the reporting period was **20,025,866**.

Creators have 90 days to submit an appeal after the video's removal, so this number also includes appeals for videos removed during a previous time period but appealed in the current reporting period. The number of appeals YouTube received for videos removed due to a Community Guidelines violation during the reporting period was **1,289,571**. The number of videos YouTube reinstated due to an appeal after being removed for a Community Guidelines violation during the reporting period was **175,862**. Note that a reinstatement counted here may be in response to an appeal or video removal that occurred in a previous time period.

Human flags by flagger type

In addition to our automated flagging systems, YouTube provides users the opportunity to report or flag content that they believe violates YouTube's Community Guidelines or other policies. Users can report content using YouTube's flagging feature. Details on how to report different types of content using YouTube's flagging features are outlined in YouTube's Help Center.

YouTube also has a [Priority Flagger](#) program, through which non-governmental organizations and government agencies who are particularly effective at identifying certain types of harmful content have access to additional reporting processes and prioritized review of their flags. These flags are reviewed under the same policies and procedures as all other pieces of content we review.

- User: 169,660,653 (99.9%)
- Organization: 200,208 (0.1%)
- Government: 41 (0.0%)

- Automated flagging: 19,413,508 (96.9%)
- User: 518,928 (2.6%)
- Organization: 93,428 (0.5%)
- Government agency: 2 (0.0%)

Video removals by reason and by country

The chart below shows the volume of videos removed by YouTube, by the reason a video was removed. Reviewers evaluate flagged videos against all of our Community Guidelines and policies, regardless of the reason the video was originally flagged.

The table below shows the number of videos removed by YouTube, by the country/region of upload. This data is based on the uploader's IP address at the time the video was uploaded. The IP address usually corresponds with where an uploader is geolocated, unless they are using a virtual private network (VPN) or proxy server. YouTube's Community Guidelines are enforced consistently across the globe, regardless of where the content is uploaded. When content is removed for violating our guidelines, it is removed globally.

Rank	Country	Value
1	India	5 075 851
2	Brazil	2 602 893
3	United States	2 002 472
4	Indonesia	1 834 649
5	Bangladesh	621 655
6	Russia	483 372
7	Pakistan	435 416
8	Turkey	365 617
9	Philippines	358 829
10	Thailand	309 474
11	Mexico	286 785
12	Vietnam	261 665
13	Argentina	258 684
14	Great Britain	241 352
15	Germany	181 807

Rank	Country	Value
16	Kazakhstan	176 446
17	Colombia	157 820
18	Ukraine	151 309
19	Iraq	142 550
20	France	139 899
21	Malaysia	138 179
22	Japan	126 643
23	Canada	116 220
24	South Korea	110 055
25	Venezuela	109 322
26	Nepal	105 872
27	Saudi Arabia	101 822
28	Egypt	94 141
29	Spain	58 974
30	Italy	51 676

Channels removed

A YouTube channel is terminated if it accrues three [Community Guidelines strikes](#) in 90 days, has a single case of severe abuse (such as predatory behavior), or is determined to be wholly dedicated to violating our guidelines (as is often the case with spam accounts). When a channel is terminated, all of its videos are removed.

The total number of channels removed by YouTube for violating its Community Guidelines during the reporting period was **5,003,437**.

The chart below shows the volume of channels removed by YouTube, by the reason a channel was removed. The majority of channel terminations are a result of accounts being dedicated to spam or adult sexual content in violation of our guidelines. When we terminate a channel for receiving three [Community Guidelines strikes](#) for violating more than a single policy within a 90-day period, we categorize it under a separate label—"Multiple policy violations".

Note: Beginning with the April–June 2025 reporting period, we began to classify certain channel terminations related to deceptive practices under "Spam, deceptive practices, and scams". In previous reporting periods, these types of removals were nested under the "Misinformation" category.

Additional restrictions on content

YouTube uses a combination of people and automated systems to detect and flag potentially age-inappropriate content for minors, which is then age-restricted. Age restrictions may be placed on content otherwise allowed under other Community Guidelines policies. More on age-restricted content [here](#).

Note: This number was updated in December 2025 to account for a data pipeline issue that resulted in partial double-counting.

Age restrictions applied
