

Digital Services Act (DSA) - Transparency Report

April 2025

This report is published in accordance with the transparency reporting requirements under Article 15 of the European Union's Digital Services Act (Regulation (E.U.) 2022/2065).

Reporting period 17 February 2024 - 16 February 2025.

Introduction

Deliveroo connects consumers, riders and merchants across local markets to bring people the food and products they love. We are a global online platform, yet a very local business. Our consumers, riders and merchants live and operate within their local neighbourhoods. We work with some of the largest and well known brands and have built a diverse base of restaurants, grocers, and retail partners across our markets. In the EU we operate in Belgium, France, Ireland, and Italy.

Restricted and inadmissible Items

Policy

Deliveroo's Restricted Items Policy sets out the types of items a partner cannot list for sale on the Deliveroo platform. Restricted items are either i) items which partners do not have the legal right to sell in the market or ii) items which partners do not have Deliveroo's permission to sell and which are against our terms.

The policy ensures that customers continue to be protected from:

- Illegal purchases.
- Any product listings which could present physical risk to consumers and riders.
- Fraud risk to consumers and partners.

Deliveroo has a zero tolerance approach to Partners listing illegal or highly dangerous items.

- If we become aware a Partner lists an item which is deemed highly dangerous and illegal, the Partner will be immediately removed from the Deliveroo platform. Removal from the platform in these cases would be permanent.
- If a partner lists items which are dangerous, but legal, the partner will be suspended from the platform.

Deliveroo notifies Partners when items breach our Restricted Items Policy and we decide to remove them.

If a Partner violates and/or repeatedly infringes this policy and/or reintroduces a product after it has been removed by Deliveroo, they may be suspended or permanently removed from the Platform.

Moderation

To tackle Restricted Items being listed on partner menus on our platform, proactive Restricted Item sweeps are conducted to flag and remove these items in markets that have live Restricted Items Policies, including all our EU markets. Restricted Item sweeps are conducted regularly on the Deliveroo platform using manual keyword searches and an automated machine learning model to generate a list of potentially Restricted Items by scanning the entire listing of items live on the platform. These searches use keywords and prompts to identify Restricted Items. The list undergoes two rounds of review, after which correctly identified products are marked as restricted and removed from the platform.

Our model scans through the full grocery and retail catalogue and produces a prediction for:

- the probability each item is restricted.
- the category of restriction.

These predictions are then passed to a human reviewer for validation. The model attempts to find all restricted items except for high value items and heavy items.

Any items deemed to be in breach of the Restricted Items Policy are removed from the platform. If we believe that items are not accurately tagged we reserve the right to tag the items or remove them from the platform.

In this reporting period **14,969 restricted items** were removed as a result of sweeps. For context, Deliveroo currently has just under 36 million items listed on our platform.

In addition, a webform is available on our EU websites whereby users and/or authorities can report content they consider may be illegal or restricted. These reports are then reviewed manually and appropriate action is taken.

Content

Policy

Deliveroo's content standards apply to any and all material which users contribute to our service, and to any interactive services associated with it. Contributions must comply with applicable law in any country from which they are posted. Contributions must not:

- Contain any material which is defamatory of any person, obscene, offensive, hateful or inflammatory, promote sexually explicit material or promote violence or promote discrimination based on race, sex, religion, nationality, disability, sexual orientation or age;
- Infringe any copyright, database right or trademark of any other person;
- Be likely to deceive any person or be made in breach of any legal duty owed to a third party, such as a contractual duty or a duty of confidence or promote any illegal activity;
- Be threatening, abuse or invade another's privacy, or cause annoyance, inconvenience or needless anxiety or be likely to harass, upset, embarrass, alarm or annoy any other person;
- Be used to impersonate any person, or to misrepresent your identity or affiliation with any person or give the impression that they emanate from us, if this is not the case; or
- Advocate, promote or assist any unlawful act.

Moderation

Whenever a user leaves a review for an order, that review is moderated by our third party content moderation service provider ActiveFence. They use AI-powered tools to identify content that violates our standards.

Additional safeguards we have in place are:

- We provide users the option to manually report reviews through the app. Whenever a user reports a review it is temporarily hidden until an agent manually reviews it and makes a decision.
- Users can also report issues with or concerns about reviews via a webform available via the Help section of our EU websites, where they can select Digital Service Reports / Reviews.
- Reports are then reviewed manually and appropriate action is taken.

Where Deliveroo has been notified by a Customer or Partner (or any other third party) about content, these requests are manually moderated.

Table 1 - automated and manual moderated content.

Automated moderation	
Total moderated reviews	1,862,383
Reviews removed	34,185 (1.84% of moderated reviews)
Manual moderation	
Review removal requests	36,515
Reviews removed following request	2,551 (7% of removal requests)

Intellectual Property Infringement notices

We occasionally receive notices from third parties that a Partner brand name, menu item name or imagery infringes their intellectual property rights. We take these reports seriously and investigate them swiftly. These investigations are carried out manually by the relevant market legal teams.

During the reporting period there were three allegations of IP infringement, in three of these cases the content was deemed to be illegal and against our terms and conditions. Partners were given notice to remove the content within seven days or face suspension. In both of these cases, the partners did not remove the content and they were suspended. There was one case where the alleged IP infringement was not deemed to be illegal and against our terms and conditions and no action was taken. Deliveroo received no appeals against these decisions.

Table 2 - IP infringement claims in EU markets.

	EU market numbers
Total IP infringement claims	4
Cases where content deemed illegal and against our Terms and Conditions - partner suspended	3
Cases not deemed illegal and/or against our Terms and Conditions	1

Orders received from Member State authorities

Deliveroo did not receive any requests from relevant Member States' authorities for either i) requests for information or ii) requests to remove content.
